PROFESSIONAL SUMMARY

Backend Developer with a B.E. in Computer Science (AI & ML) and hands-on internship experience using NestJS, TypeScript, and PostgreSQL. Skilled in building and maintaining REST APIs, working with relational databases, and delivering feature updates aligned with business requirements. Looking to contribute to a product-focused engineering team.

EXPERIENCE

Backend Developer Intern | Tezcrecidt — April 2026 – June 2026

- Contributed to the development of an internal dashboard application, implementing backend functionality and feature updates based on company requirements.
- Built a blocked users module to manage and restrict access for flagged accounts, improving platform security and control.
- Worked with vendor logs and databases, monitoring vendor activity, updating records, and maintaining data accuracy.
- Collaborated with the development team to troubleshoot issues, implement requested changes, and deliver updates aligned with company needs.

TECHNICAL SKILLS

Backend	NestJS, TypeScript, Node.js, REST APIs
Database	PostgreSQL, TypeORM, SQL
ML / Data	Python, Pandas, NumPy, Scikit-learn, Matplotlib
Tools	Git, GitHub, Postman, VS Code
Frontend	HTML, CSS, JavaScript (Basic)

PROJECTS

URL Shortener API | NestJS · TypeScript · PostgreSQL · TypeORM · nanoid

- Built a URL shortening service that generates unique 6-character short codes for long URLs using nanoid.
- Stored original URLs, short codes, and creation timestamps in PostgreSQL using a TypeORM entity.
- Tracked redirect hit count per URL with an auto-incrementing click_count column updated on each visit.
- Exposed a public redirect endpoint that resolves the short code and issues a 301 redirect to the client.
- Validated incoming long URLs with class-validator IsUrl decorator inside a NestJS DTO before saving.

Expense Tracker API | NestJS · TypeScript · PostgreSQL · TypeORM · JWT

- Developed a personal finance REST API where users can log daily expenses with amount, category, and date.
- Implemented JWT-based authentication so each user can only create, view, and delete their own expense records.
- Built a monthly summary endpoint that aggregates total spending per category using TypeORM GroupBy queries.
- Added date-range filtering on the expense listing endpoint so users can query expenses within any time window.
- Structured the project with NestJS modules, DTOs, Guards, and service layers following clean architecture.

EDUCATION

B.E. Computer Science (AI & ML) — Teegala Krishna Reddy Engineering College, Hyderabad | 2022 – Present

Higher Secondary (MPC) — Telangana Minority Residential Junior College, Narsapur | 2020 – 2022

CERTIFICATIONS

- Data Science with GenAI — Front Line Media (FLM)
- Introduction to Machine Learning — Preplnsta

SOFT SKILLS

Quick Learner • Problem Solving • Positive Attitude • Decision Making • Team Collaboration • Attention to Detail • Time Management • Strong Work Ethic • Full Commitment to Work
